Description of Hydrostatic Test of Pressure Vessel

This service is to be issue in conjunction with pressure testing of all high pressure cylinders and CO2 fire extinguishers when required >300bar in general filling pressure is normally 3/5 of test pressure

The intervals and requirements regarding Hydrostatic testing of pressure vessel are subject to rules & regulation laid down by the various administrative including IMO/ SOLAS, Flags state, Port state and country requirement.

As the general guideline it can be said that as long as the cylinders or pressure vessel is physically taken off the ships, the local rules are in force. If cylinder or pressure vessel is kept onboard the flag of the ship, i.e. the regulations referring to the country of the registration are applicable
